

## **CUSTOMER RESPONSIBILITY Application & Machine Tool Purchase**

### **DESIGN MATERIAL**

The customer is to supply all parts to be processed. All information on disc form, either SolidWorks format or a translation of in .dwg format.

### **TRYOUT PARTS**

The customer is to furnish all tryout parts. These parts are to be in accordance with the engineering assembly and detail drawings furnished to us by the customer for equipment design purposes. In the event of a change in the customer part design or if after manufacturing, the parts deviate from the piece parts shown on the drawings submitted, charges will be made for any necessary redesign, rework, or development of the equipment. Furthermore, there will be no guarantee the equipment can be made to accommodate anything other than the parts as stated in the final written proposal and as shown on the customer drawings and outlined therein.

### **CUSTOMER APPROVAL**

All equipment design layouts shall be reviewed with and approved by the customer before being released for manufacturing. The customer shall, when notified by SurClean send the same representative who approved these layouts to our factory to witness the testing and demonstration of the equipment, and to approve the equipment for shipment.

### **SAFETY**

The equipment offered in this proposal includes normal safety features including guards for pinch points and moving members. Final interpretation of complete compliance with applicable sections of OSHA specifications will be determined by SurClean personnel. This is due to the fact that local requirements may vary. Also, there are specific exceptions for certain types of industry to consider in the requirements. Any protection equipment required to be installed by SurClean in addition to that described above, which in the opinion of SurClean personnel is of significant cost, shall be added at a negotiated price prior to shipment. Customer's approval to ship this equipment shall constitute full acceptance and relieve SurClean, Inc. of any further responsibility to comply with OSHA specifications as covered in the order contract between both parties.

### **SUPPLIED MATERIAL**

All customer supplied material, unless otherwise specified in the quote, will be in proper working order when received at SurClean. Any SurClean time lost on troubleshooting or repairing the material will be charged at the applicable rate. The rate is determined by when the work takes place (standard, O/T, weekend, holiday). This could also affect the completion date of the project, to which SurClean will not be held responsible.

### **INSTALLATION**

Supply all primary drops to the equipment.

### **EQUIPMENT SPECIFICATIONS**

If machine equipment standards are available, they must be issued with the request for quote or SurClean will quote their preferred machine equipment
